

Revised Vision Plan for Stichting Habait (2023-2028)

Stichting Habait envisions a comprehensive and impactful approach over the next five years (2023-2028) to save and care for old farm animals. Building upon our current efforts, we have refined our vision plan to ensure greater success and sustainability. Our revised plan includes the following key elements:

1. **Expanding Animal Capacity:** We aim to increase the number of animals on the farm from the current 210 to approximately 400 by 2028. This expansion will require the development of suitable infrastructure and facilities to accommodate the growing population of animals effectively.

2. **Diversifying Funding Sources:** To support our mission, we will continue to seek and secure budgets from external sources. However, we recognize the importance of diversifying our funding streams. Our revised plan includes efforts to establish long-term partnerships with foundations, corporate sponsors, and individual donors who share our passion for animal welfare.

3. **Engaging the Local Community:** We believe in the power of community involvement. To strengthen our ties with the local community, we will actively engage them in farm activities. Through organized events, such as open days, workshops, and educational programs, we will foster a sense of ownership and encourage participation from individuals, families, and businesses in the vicinity.

4. **Educational Outreach:** Recognizing the transformative potential of education, we will prioritize hosting school children activities at the farm. These educational experiences will allow young minds to understand and appreciate the value of animal welfare and instill a sense of empathy and responsibility towards animals.

5. **Awareness and Volunteer Recruitment:** We understand the importance of spreading awareness about our mission and engaging volunteers. Regular events will be organized to increase public awareness and generate support for our cause. These events will also serve as platforms for recruiting passionate individuals who are willing to contribute their time and skills to help care for the animals.

6. **Sustainable Expansion:** To accommodate the growing number of animals, we will expand our activities to additional pastures near the farm. By utilizing these pastures for hay cultivation and as additional areas for animal housing, we can ensure the well-being of a larger number of animals while also promoting sustainable agricultural practices.

7. **Continuous Evaluation and Improvement:** Throughout the implementation of our vision plan, we will regularly evaluate our progress and make necessary adjustments. We will gather feedback from stakeholders, assess the impact of our activities, and refine our strategies to maximize the effectiveness of our efforts.

By adopting these refined strategies and maintaining a strong focus on animal welfare, community engagement, education, and sustainability, Stichting Habait is committed to making a significant and lasting difference in the lives of old farm animals. Together, we can create a compassionate and supportive environment for these animals and inspire others to join us in our mission.
